Subject: RE: Ex. 6 Personal Privacy (PP)

I have spoken with Ex. 6 Personal Privacy (PP) and plan to visit his home at 2 p.m. today. I know changes in schedule happen, but a reschedule date may be advised at some point. Or an update on a sample, if there is one to provide. I do feel this neighborhood may need additional assistance with regards to information and/or testing which we can discuss on the phone. Our third-party consultant will be grabbing samples today as well.

Thank you,

Brent Bader

So that's why you're not coming here, No new information? Pretty funny at the city meeting last night they told me you were coming too. Now it changed for some reason. Yes they called and said they don't have them YET ? Why is this taking so long for these results? Why would they not be rushed?. I am really frustrated that this plan has changed. Wonder why we don't trust the usepa . So at 7am when you emailed me, who did you talk to Carus or the city to cancel our planned meeting since last friday. That RMS crew has been out in the woods doing something. So you have no update for the city either? I find this really hard to believe. Is the epa guy that was here friday , here today? How can you tell me its ok , without test results? I need to know why from our email last night your plan was to meet me , 7am it changes? You don' see something wrong with that?

Unfortunately I do not have any new information to share. I'm not sure who told you I had your test results. I explained below that Illinois EPA collected those results and someone from Brad Frosts office will communicate them to you.

Robert,

Do you have plans on talking w me at all. I was told you were going to give me my test results today? This is very stressful situation. Please keep me posted on your plan.

I contacted Illinois EPA and have not heard when the results would be available. However, Brad Frosts confirmed someone from his office should be reaching out to you once those results are in. I can't speak for why results are taking so long but typically results are received up to two weeks after submittal.

I'll be in town tomorrow and can stop by your house if you have other concerns likely between 11-12.

Rob

Robert

I have called Brad more than once for my results. How can they say it's safe when my test are not in? Why is this taking so long? I feel like we are being down played over here. I walked my whole neighborhood. We got hit the hardest, I seen it go over my home, while it poured down on me. Raw material ,not only potassium permanganate. Please help me trust this process. The plume headed nw from my home. Look forward to hearing from you.

Rob,

That sounds good Ex. 6 Personal Privacy (PP)

I thank you for your help and contacting me back.

I'd like to let you know that my coworker, Paul Ruesch and Illinois EPA, will be in La Salle around lunch-time tomorrow (1/20). I'm out of State and Paul has been working on this response with me since the start. They can meet with you and discuss the Site around lunch time if your available. Paul will give you a call to confirm your around tomorrow.

Robert,

This is [Ex. 6 Personal Privacy (PP)] gave you my contact information at the city press conference. You sent epa guys to test the product that was dumped on me and my property. How do I get the results to the tests that they took. I am not comfortable with how this is being down played as safe. It's ate the paint off my porch , my trucks , ate thorough the rubber dog toys in the yard as well. I can go on. How the epa can say we are ok is mid blowing to me. We are getting the run around from everyone. City sends us to your website for updates which in return goes back to the city website or carus.

Please contact me , as you know I am a very intelligent guy and need answers. Look forward to hearing back asap
